Source: U.S. Census Bureau, Census 2000 Summary File 1, Matrices P1, and P2

Scale 1:660000 inches

Thomas Analysis : The data distribution shown above is consistent with Map 1 (Total Persons) Rather than raw count the percentages are shown. While much could be inferred from Map 1, the percentages show a finer level of detail by showing that almost 98% of the county population lives in the southern part of the County, which is considered an urban area by the US Census Bureau.
